

## **Dial World Communications, LLC**

### **STATEMENT OF POLICY REGARDING CUSTOMER PROPRIETARY NETWORK INFORMATION**

Set forth below is a statement summarizing the policies and procedures of Dial World Communications, LLC ("Dial World Communications") which ensure adequate compliance with the Federal Communications Commission's ("FCC") CPNI regulations. See 47 C.F.R. § 64.2001 et seq. Dial World Communications provides telecommunications services exclusively on a prepaid basis.

As a prepaid services provider, the company does not have access to CPNI. Prepaid services customers do not "subscribe" to the services of Dial World Communications in the same manner as customers of non-prepaid service providers; rather, these customers decide for themselves if they will use the company's services. These customers do not receive bills from Dial World Communications. Dial World Communications does not have information concerning the quantity, technical configuration, type, destination, location, or amount of use of telecommunications services which can be associated with any individual customer. Indeed, because the company's prepaid services may lawfully be utilized by any authorized user of the purchased services, Dial World Communications has no means of identifying the particular individual which has placed any particular call.

Nevertheless, Dial World Communications has adopted a confidentiality policy that addresses proper handling, use and storage of CPNI and, furthermore, the company has informed its employees of the company's CPNI compliance policy. Dial World Communications does not release or distribute CPNI to unauthorized individuals; neither does Dial World Communications use CPNI in violation of Section 64.2001 et seq. of the FCC's Rules.

To the extent Call Detail Records ("CDRs") exist, they are not associated with any individually identifiable customer and do not constitute CPNI. To the extent that such CDR information exists in paper, removable magnetic or optical form, it is maintained by Dial World Communications in a secure location which is not accessible by employees of Dial World Communications without going through the company's established security procedures. When such information is maintained on a computer, the computer and/or the individual file is password protected.

As noted above, Dial World Communications does not maintain CPNI in any manner which would give rise to the unauthorized disclosure of confidential information. Even in cases dealing with the limited information which is necessary to facilitate customer purchases of prepaid telecommunications services, Dial World Communications takes steps prior to providing any requested information to assure itself that the individual making the request is authorized to obtain it.

Moreover, any call detail information obtained by Dial World Communications is not made available to end-user customers or third parties over the telephone, online, or in retail stores. However, such information may be disclosed: (a) in response to a proper subpoena, court order or other judicial process; or (b) to the transmitting or receiving carriers for billing-relating purposes. In the event of unauthorized CPNI access, Dial World Communications will notify the requisite law enforcement agencies, and the customer when possible.

Dial World Communications did not have any breach of its call detail records during the past year, nor has the company received any customer complaints in the past year concerning the unauthorized release of or access to CPNI. Because Dial World Communications does not have any presubscribed customers, and does not know the identity of end-users whose traffic is routed through Dial World Communications, it cannot notify those end-user customers directly if a breach occurs. However, Dial World Communications has processes and procedures in place to maintain records of any security breaches and to notify affected carriers and law enforcement of such breaches. Finally, the company has no information, other than publicly reported information regarding the processes that

pretexters or data brokers are using to attempt to access CPNI.
